

THE REAL ENEMY WITHIN:

Who is hurting the blacks?

The people of America who are really being hurt in the crossfire of demagoguery and mongrelization are the sincere, hard-working, law abiding people of the Black community. While millions of dollars are being spent in propagandizing Blacks, much of this is really hurting them. The daily threats coming from liberal legislators in Washington and the media, regarding Southern Whites bowing to Black demands is doing little but hardening the resolve of many White people that they are not going to have their lives run by the Jew dominated "carpetbaggers" from the North. Even in the North, the indiscretions of sentimental liberal saps are crystallizing a resentment which the average person cannot understand. The propaganda on TV, which shows a Black as the top detective in most every "cop" program, and Blacks walking arm in arm with white girls, is breeding a white resentment which few people care to understand. The constant throwing together of Blacks and Whites in intimate scenes on the TV screen, is causing a burning resentment in many at the present time, even though they will not openly admit it. This propaganda is not for the purpose of helping Blacks, or for bringing about an understanding between the races. The Black people of America are being prepared by the International Jewish Communists, to be the "cannon fodder" in a race war they hope to start, so that they can pick up the pieces and have their one-world government.

The election of a Black girl as campus sweetheart in a Mid-Western College was a bad blunder. In the first place, the word "sweetheart" suggests a close and intimate male-female relationship, social-intermingling and possibly love-making. Of course the Black population in these States is relatively small and many people in rural areas have little understanding of the "Black problem." (I was almost twenty years old before I saw my first Black.) The sweetheart thing could very well have been a sentimental gesture by those who did not want to seem to discriminate. But such things as this are manipulated by small-time liberal operators for a completely different reason. The evil it will do, in the provocation of illicit relationships between the races is incalculable.

It saddens me to think of the consequences which could be wreaked on honest, patriotic Blacks, when this thing comes to a head and the manipulators are safely out of the danger area.

When resentment finally crystallizes - and it always does - the manipulators are seldom the ones who suffer. It is very possible that the Whites, who ignore mongrelization today, will be the ones who will react in the most extreme manner when they finally wake up and realize what the enemy has done to us.

A lot of ministers of the Gospel who should know better, and who have fooled their people in this racial matter, better look for a deep hole to hide in when this thing breaks, for they are going to have some embarrassing questions to answer before their congregations, as to why they twisted God's Laws concerning race mixing. They will be caught in a trap of their own making and I can predict that it will not be a pleasant one. We need to remember that Galatians 6:7 was written to Christians, for Christians, about Christians - "Be not deceived, God is not mocked; whatsoever a man sows that shall he also reap." This is sometimes known as the LAW OF HARVEST and it proves true 100% of the time. Today, a majority of our ministers and politicians are "sowing to the wind, "and the day is coming soon, when they will "reap the whirlwind." It will not be pleasant!

When the time of awakening comes to both Blacks and Whites, history will probably repeat itself and the innocent will suffer along with the guilty. Malcolm "X" deceased leader of the Black Muslims once made this true statement: "When you add cream to coffee, you come up with a weak mixture and both ingredients suffer." Of course he was speaking about racial mixing and he was exactly right. Would that more of our "bleeding heart" liberals could understand this "fact of life."

WAKE UP AMERICA!
